Project

MIS3313 - 21427

Due 04/24/2024

Overview

The intent of this assignment is to demonstrate the ability to read the documentation from book or online and then make use of that documentation.

Design an original web site with 3 html pages and 1 form using the UHD theme.

- Make use of the Bootstrap CSS framework across multiple pages.
- Make use of the DOM concept and Javascript

Requirements:

1. Create 3 HTML web pages and 1 form.
2. Use valid and semantically appropriate HTML5.
3. Use the Bootstrap CSS Framework (http://getbootstrap.com/). Any additional non-bootstrap CSS must be contained within a single additional CSS file.
4. The home file is named index.html.
5. The home file integrates two Google fonts.
6. The links from the menu on each page allow users navigate to different pages.
7. At least 1 page must use the DOM concept and Javascript
8. The form has a minimum of 10 different controls.
9. The form uses http://www.randyconnolly.com/tests/process.php as its action.
10. If there are dummy links, make the destination URL "#".

Report

1) The report has a table of content, introduction, body and a conclusion.
2) Explain the design theme and concept.
3) List the styles of each html page (example Chapter 7 - page 320).
4) Explain the form and each html page.
5) Include name of the team member on top of the report.
